*Re: Revision of Part 15 of the Commission's Rules to Permit Unlicensed*

*National Information Infrastructure (U-NII) Devices in the 5 GHz Band,*

*ET Docket No. 13-49*

*Comments in Support of Petition for Reconsideration of WISPA, Cambium, Mimosa Networks and JAB*

Dear Madam Secretary,

The 5GHz spectrum is an integral part of all the WISP businesses. These changes will have effects in many ways. First it will cause small WISP's to close their doors which will cause job loss and loss of services to subscribers that have no other options. Job loss as you know will affect the recovery of our country as we still have many people that are unemployed. Then any of the WISP's that can manage to keep in operation they will have loss of subscribers which in turn is a reduction of income, once again causing loss of employment for some. We currently use the 5GHz spectrum for mostly our point to point communications so that we can reach distances that we cannot reach with licensed spectrum due to cost. These changes will cause loss of service to many locations as fiber connectivity is not an option in our rural communities that we provide service to.

Finally, we will also be restricted in the amount of bandwidth that we can provide to our customers and that could be devastating both educationally as well as entertainment. Our services allow many people to continue their education and without they would be unable to go to college.

Thanks,

Viviana Reynolds - Office Manager

Alex Reynolds - Technician

Kenny Angelozzi - Technician

Tommie Dodd- Managing Member
